▸ Tailored for Runlayer – Forward Deployed Engineer / MoTS, Identity

A secure MCP gateway that integrates with Okta and Entra, enforces credential boundaries, and governs what agents can touch. That is my background — SSO, OIDC, fine-grained access — applied to the agent era.

■ Why Runlayer

† Identity is my deepest domain. I replaced a legacy identity & subscription system servicing billions of monthly requests across 10+ products, and configured SAML/OIDC SSO for 150+ enterprises.

† I already think in agents + tool calls. CreateSuite coordinates autonomous agents with an inter-agent mailbox and persistence – I understand the access and audit surface agents create.

† Forward-deployed credibility. Direct enterprise relationships with security-conscious legal teams; I translate between security requirements and shipped product.
