Hiring Team at Alvarez & Marsal

I am applying for the Manager - Product & Technology, Technology Industry Group (TIG) - Private Equity role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Alvarez & Marsal is building ~20% of revenue AI-driven, targeting 50% by 2028; global AI board; hiring up to 200 AI-skilled staff — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- breadth across AI/agents, platforms and security as the ability to rapidly assess a portfolio company's product and tech maturity: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
