Hiring Team at Amazon

I am applying for the Lead PMT role (Remote).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

WHY I AM A STRONG FIT:

- Amazon is building AI agents, document AI, identity, platform PM, enterprise SaaS, developer tools — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- identity & security PM (LBR) + AI-agents PM (Obsess) = built secure agent authorization: Built AI-based document scanning and led IAM for a research platform serving 1,000+ clients at Manatt.
- I've shipped the work this role calls for — including: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
