[COVER LETTER](#) · [AMAZON WEB SERVICES \(AWS\)](#) · [SENIOR PRODUCT MANAGER - TECHNICAL \(EXTERNAL SERVICES\)](#)

Hiring Team at Amazon Web Services (AWS)

I am applying for the Senior Product Manager - Technical (External Services), AWS Support and Operations role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Amazon Web Services (AWS) is building Bedrock (foundation models), Amazon Q, SageMaker, AI agents, and AI across the platform; AWS... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- technical/devtools PM (Obsess) and platform work: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.
- I've shipped the work this role calls for — including: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-ljeit2

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
