[COVER LETTER](#) · [BLOOMBERG](#) · [PRODUCT DELIVERY MANAGER - ENGINEERING COO OFFICE](#) · [NEW YORK, NY](#)

Hiring Team at Bloomberg

I am applying for the Product Delivery Manager - Engineering COO Office role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Bloomberg is building BloombergGPT/finance LLMs, GenAI developer platform, AI-ready data, document & content extraction... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- I run cross-team delivery cadences and shipping platform initiatives across engineering orgs under tight enterprise constraints: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1gwjk02

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
