## Hiring Team at Capital One

I am applying for the Senior Data Product Manager role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

### WHY I AM A STRONG FIT:

- Capital One is building Enterprise AI/ML platforms, agentic AI for customer assistance, developer productivity, and data... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- I ship data/document-AI products that turned raw data into trusted, consumable assets: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.
- Ive shipped the work this role calls for — including: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

### A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.
