COVER LETTER · CAPITAL ONE · SENIOR PRODUCT MANAGER, AI & DEVELOPER PRODUCTIVITY DATA STRATEGY ·

Hiring Team at Capital One

I am applying for the Senior Product Manager, AI & Developer Productivity Data Strategy role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Shipped RAG-powered semantic search over an editorial corpus, deployed at alexwelcing.com.

WHY I AM A STRONG FIT:

- Capital One is building Enterprise AI/ML platforms, agentic AI for customer assistance, developer productivity, and data... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- I build AI developer tooling at Obsess and the metrics proving developer productivity gains: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.
- Ive shipped the work this role calls for — including: Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-o3rghp

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
