## Hiring Team at Cockroach Labs

I am applying for the Sr. Product Manager - Business Continuity & Disaster Recovery (BCDR) role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

### WHY I AM A STRONG FIT:

- Cockroach Labs is building Database infrastructure underpinning AI/agent apps; reliability, scale, and Postgres compatibility... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- developer-platform PM rigor and enterprise-trust framing (security/identity at LBR) to show he can own reliability-critical product: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

### A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
