Hiring Team at CoreWeave

I am applying for the Senior Product Manager, Data Center role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.

WHY I AM A STRONG FIT:

- CoreWeave is building The 'essential cloud for AI': GPU clusters, AI training/inference infra, data-center and managed... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- If pursuing, lead with platform PM rigor and AI-workload understanding; otherwise deprioritize vs. better-fit CoreWeave roles: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
