[COVER LETTER](#) · [DATADOG](#) · [GROUP PRODUCT MANAGER - THREAT DETECTION AND INCIDENT RESPONSE \(CLOUD SIEM\)](#)

Hiring Team at Datadog

I am applying for the Group Product Manager - Threat Detection and Incident Response (Cloud SIEM) role (New York, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

WHY I AM A STRONG FIT:

- Datadog is building LLM/Agent Observability, AI Guard, Sensitive Data Scanner, GPU monitoring, Model Lab, AI & Data... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- LBR identity & security PM experience, framing identity/threat context as adjacent to detection & response: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.
- I've shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1lb5b92

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
