[COVER LETTER](#) · [DATADOG](#) · [PRINCIPAL AI TRUST & SAFETY TECHNICAL PRODUCT MANAGER](#) · [REMOTE](#)

Hiring Team at Datadog

I am applying for the Principal AI Trust & Safety Technical Product Manager role (Remote).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Unified access models across legacy and new product surfaces, unlocking new revenue.

WHY I AM A STRONG FIT:

- Datadog is building AI agents, document AI, identity, platform PM, enterprise SaaS, developer tools — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- the intersection of LBR security/identity and Obsess/Manatt AI work: Built AI-based document scanning and led IAM for a research platform serving 1,000+ clients at Manatt.
- I've shipped the work this role calls for — including: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1iia9ix

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
