Hiring Team at Datadog

I am applying for the Senior Product Manager - Database AI Optimization role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale.
Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

WHY I AM A STRONG FIT:

- Datadog is building LLM/Agent Observability, AI Guard, Sensitive Data Scanner, GPU monitoring, Model Lab, AI & Data... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- applied-AI PM credibility (Obsess/Manatt) and platform mindset; acknowledge and bridge the database-specific learning curve: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- I've shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-100kna1

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
