Hiring Team at DoorDash

I am applying for the Product Manager (Multiple Levels) role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- DoorDash is building AI merchant onboarding, AI menu 'smart tags', AI-built merchant websites, AI ads/personalization — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- Arkadium subscription & user-growth wins framed as marketplace growth: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- I've shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

A FEW SHIPPED REFERENCE POINTS:

- Public company
- [REVIEW: add concrete proof (metric, scale, customer count)]

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-hgeh8a

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
