WHY I AM A STRONG FIT:

- Finch is building API/data infrastructure; enabling automation (incl — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- API/developer-platform PM wins — frame as building integration products developers and partners adopt, with the retirement domain as a focused ramp: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- I've shipped the work this role calls for — including: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.
