Hiring Team at Fireblocks

I am applying for the Senior Product Manager, Fireblocks Trust Company role (New York City Metropolitan Area).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Ran SSO / SAML / OIDC onboarding for 150+ AmLaw 200 firms.

WHY I AM A STRONG FIT:

- Fireblocks is building Primarily security/infra (MPC, key management); not an 'AI company' — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- LBR: Ive shipped security/identity products where trust and regulatory rigor are the product - directly relevant to qualified custody: Unified access models across legacy and new product surfaces, unlocking new revenue.
- Ive shipped the work this role calls for — including: Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1leoxsc

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
