Hiring Team at Gen

I am applying for the Senior Product Manager - Norton Money role (New York, NY).

My pitch for this role is simple: I'm a product PM who has driven subscription growth at scale. Pioneered NLP-driven AI content partnerships at Arkadium, driving \$1M+ projected annual revenue contribution.

WHY I AM A STRONG FIT:

- Gen is building 'Gen AI Foundry' trust layer; Norton 'Family Assistant' secure AI agent; AI-enhanced security;... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- identity/security protection with financial-wellness — frame Alex as the trust-and-growth PM for money products: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Ive shipped the work this role calls for — including: Built the type-safe AI API workspace with self-improving usage accuracy at LBR.

A FEW SHIPPED REFERENCE POINTS:

- Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
