[COVER LETTER](#) · [AI PRODUCT / PLATFORM](#) · [PRINCIPAL / STAFF PRODUCT ROLES](#) · [NYC / REMOTE / HYBRID](#)

Hiring Team at AI Product / Platform

I am applying for the Principal / Staff Product Roles role (NYC / Remote / Hybrid).

My pitch for this role is simple: Built for broadly technical AI product, platform PM, and product-leadership roles where production judgment matters: AI systems, enterprise deployment, and hands-on TypeScript/Python builder credibility.

WHY I AM A STRONG FIT:

- AI product shipped as working systems: Built [lupi.live](#) as a real R3F/WebGL molecule viewer and [lupine.science](#) as the research/company layer behind the materials-science work; shipped an AI API execution workspace at LBR with type safety, live introspection, and self-improving usage accuracy.
- Platform judgment from enterprise systems: Re-platformed identity and subscription infrastructure across 10+ LBR products serving billions of monthly requests, then translated the same operating discipline into AI, document intelligence, and developer-facing workflows.
- Product taste plus implementation depth: Led 3D commerce platform work for Alo, Moncler, and Ralph Lauren at Obsess, built legal document AI and IAM at Manatt, and can prototype in TypeScript/Python rather than handing execution to someone else.

A FEW SHIPPED REFERENCE POINTS:

- 12+ years shipping product, code, and judgment end-to-end
- Billions of monthly requests served by systems rebuilt at LBR
- AI, document understanding, 3D interfaces, and enterprise platforms in one operating model

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1eihmyl

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
