[COVER LETTER](#) · [GLEAN](#) · [FOUNDING FORWARD DEPLOYED ENGINEER](#) · [REMOTE \(US\)](#)

Hiring Team at Glean

I am applying for the Founding Forward Deployed Engineer role (Remote (US)).

My pitch for this role is simple: A founding FDE discovers unsolved problems at strategic accounts and builds new product surfaces. I have done 0→1 inside enterprises and built full platforms solo.

WHY I AM A STRONG FIT:

- 0→1 builder with enterprise reps: Rebuilt client settings & analytics apps from scratch at LBR, and built High Era — a full marketing-automation OS (FastAPI + SvelteKit + GCP) end-to-end.
- Enterprise integration is muscle memory: SSO/connector-style integration across 10+ products and 150+ firms — exactly the connector + access surface Glean lives in.
- I close trust with executives and engineers: White-glove onboarding with enterprise legal leadership; I tailor depth to the room.

A FEW SHIPPED REFERENCE POINTS:

- Full marketing-automation OS built solo on GCP
- Billions of requests, 10+ products unified
- 348 public repos · Arctic Code Vault contributor

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1d0i1bo

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,

Alex Welcing
