Hiring Team at Hebbia

I am applying for the Product Manager, Document Intelligence role (New York City).

My pitch for this role is simple: Document intelligence for finance and legal knowledge workers is exactly the problem I cut my teeth on — AI document processing, knowledge graphs, and access at scale.

WHY I AM A STRONG FIT:

- Document AI is in my history: Built AI-based document scanning and knowledge-graph precision at Manatt; took the publishing SaaS to millions in ARR.
- Knowledge-worker products at scale: Led IAM and product for a research platform serving top-1000 clients with secure access to legal & regulatory analysis.
- PM who prototypes the hard parts: NextDocsSearch is my own semantic-search platform — OpenAI embeddings + pgvector in Supabase, deployed at alexwelcing.com.

A FEW SHIPPED REFERENCE POINTS:

- AI document scanning shipped for legal publishing
- Semantic search built with embeddings + pgvector
- Publishing SaaS taken to millions in ARR

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1fufmym

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
