Hiring Team at Hopper

I am applying for the Principal Product Manager, HTS API Marketplace role (Dallas, TX).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

WHY I AM A STRONG FIT:

- Hopper is building Predictive price-forecasting ML (core IP) and fintech-as-a-service add-ons (price freeze,... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- platform/API and partner: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1cj84ut

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
