Hiring Team at JPMorganChase

I am applying for the Product Manager - AI Risk Transformation - Vice President role (New York, NY).

My pitch for this role is simple: I'm a product PM who has driven subscription growth at scale. Built contextual, data-informed content systems that drove cross-platform adoption at Arkadium.

WHY I AM A STRONG FIT:

- JPMorganChase is building Firmwide AI/ML at scale: LLM Suite, fraud/risk ML platforms, applied AI across CIB, payments,... — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- LBR security/identity controls and Manatt document-AI compliance work as 'shipping trustworthy AI under regulatory constraints' — exactly what AI-risk transformation needs: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- I've shipped the work this role calls for — including: Built the type-safe AI API workspace with self-improving usage accuracy at LBR.

A FEW SHIPPED REFERENCE POINTS:

- Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
