Hiring Team at Keycard

I am applying for the Founding Product Manager (proactive) role (Remote (Americas)).

My pitch for this role is simple: Identity for agents is the clearest through-line in my career, and it is rare to find a PM who can pair that domain depth with hands-on agent-building experience.

WHY I AM A STRONG FIT:

- Identity is my single deepest expertise: Replaced a legacy identity & subscription system at billions-scale; configured SAML/OIDC SSO for 150+ AmLaw 200 firms.
- I understand agents at a build level: lupi.live / lupine.science — my materials-science AI stack — means I understand the access, credential, and audit surface agents introduce.
- First-PM range: strategy + hands-on: Architect PM who sets strategy and prototypes in TypeScript; comfortable owning product 0→1 with founders.

A FEW SHIPPED REFERENCE POINTS:

- IAM for 150+ enterprises
- Unified access across 10+ products at billions-scale
- Multi-agent system built solo

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-92qj6w

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
