Hiring Team at Kroll

I am applying for the Manager, AI Transformation – Advisory role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Kroll is building AI Risk Consulting practice, Kroll Decision Intelligence (data science + AI), new tech/AI-leveraged... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- a practitioner-turned-advisor — 'I've shipped AI/agents and document-AI in production' — lending credibility to AI-transformation guidance; note it's a pivot from product: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- I've shipped the work this role calls for — including: Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
