Hiring Team at Legora

I am applying for the Senior Product Manager role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

WHY I AM A STRONG FIT:

- Legora is building LLM/agent-driven legal research, document review, and drafting; document AI at the core — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- document-AI for legal/professional-services workflows (Manatt) plus agent product depth (Obsess): Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.
- Ive shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
