COVER LETTER · MERCURY · SENIOR PRODUCT MANAGER - API & AGENTIC BANKING · NEW YORK, NY

Hiring Team at Mercury

I am applying for the Senior Product Manager - API & Agentic Banking role (New York, NY).

My pitch for this role is simple: I build at the boundary of product and code: enterprise identity/subscription systems, AI API tooling, and agent/document/search prototypes with real implementation detail.

WHY I AM A STRONG FIT:

- API and access-control product depth: Rebuilt identity/subscription across 10+ LBR products serving billions of monthly requests.
- Developer-facing AI systems: Shipped an oRPC AI API workspace with live introspection and accuracy feedback loops.
- Hands-on AI builder credibility: Built Lupine and lupi.live: MLIP benchmarks, phase-change simulation, and WebGL visualization.

A FEW SHIPPED REFERENCE POINTS:

- Billions of monthly requests behind rebuilt identity/subscription systems
- Type-safe AI API workspace and developer-facing AI tooling
- 1000+ Lupine repo commits in 2026

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-t9kjcl

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
