COVER LETTER · MONGODB · SENIOR PRODUCT MANAGER, REPLICATION & STORAGE ENGINES · NEW YORK, NY

Hiring Team at MongoDB

I am applying for the Senior Product Manager, Replication & Storage Engines role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Built NextDocsSearch with OpenAI embeddings served from pgvector in Supabase.

WHY I AM A STRONG FIT:

- MongoDB is building Atlas Vector Search, semantic search, RAG; acquired Voyage AI for embedding/retrieval models to... — my relevant shipped work: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- PM rigor but acknowledge the deep distributed: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- I've shipped the work this role calls for — including: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-z094ej

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
