[COVER LETTER](#) · [MONGODB](#) · [SENIOR STAFF PRODUCT MANAGER, QUERY](#) · [UNITED STATES](#)

Hiring Team at MongoDB

I am applying for the Senior Staff Product Manager, Query role (United States).

My pitch for this role is simple: Alex has lived this problem from the inside: at LBR (Law Business Research) Alex re-platformed the identity & subscription system to handle billions of requests/mo across 10+ products, and ran SSO/SAML/OIDC onboarding for 150+ AmLaw 200 firms. Combined with leading IAM at Manatt for 1,000+ clients, it's a direct fit for MongoDB's trust-and-security surface.

WHY I AM A STRONG FIT:

- Enterprise deployment and trust: Law Business Research: 150+ enterprise SSO integrations and identity systems serving high-trust legal customers at scale.
- Document and knowledge-work AI: Manatt: AI document scanning and knowledge-graph improvements for legal publishing workflows where precision mattered.
- 8+ yrs PM, senior/staff level: I bring experience Open the resume on the LBR identity re-platform -- SSO/SAML/OIDC for 150+ AmLaw 200 firms and subscription at billions of requests/mo. Frame Alex as a technical PM who ships 0-to-1 and partners tightly with engineering.

A FEW SHIPPED REFERENCE POINTS:

- Enterprise deployment and trust
- Document and knowledge-work AI
- Platform and developer-tooling product work

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-xraxnk

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
