Hiring Team at Morgan Stanley

I am applying for the VP, Senior Product Manager-Data Products & Platforms role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale.

Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

WHY I AM A STRONG FIT:

- Morgan Stanley is building Enterprise GenAI (AI @ Morgan Stanley Assistant/Debrief built with OpenAI) for advisors; AI/data... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- platform PM building governed, reusable services; tie security/identity rigor to data governance: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.
- I've shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

A FEW SHIPPED REFERENCE POINTS:

- Public company

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
