Hiring Team at Motion Recruitment

I am applying for the Technical Product Manager - AI (Hybrid NYC) role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Motion Recruitment is building N/A directly — places AI/product talent at client firms — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- technical AI/agent product shipping and devtools depth; ask recruiter to name the client and tailor: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

A FEW SHIPPED REFERENCE POINTS:

- Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Unified access models across legacy and new product surfaces, unlocking new revenue.
- Shipped a type-safe AI API workspace (oRPC) with self-improving accuracy.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
