Hiring Team at Moxxi Digital

I am applying for the Lead AI Product Manager role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Built High Era — a full go-to-market automation OS (FastAPI + SvelteKit + GCP), architected end-to-end as a single operator.

WHY I AM A STRONG FIT:

- Moxxi Digital is building 'AI-native automations,' ad-serving and audience-management optimization — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- Arkadium platform-PM + AI-automation as ready-made to ship AI-native ad automation without ramp time. Verify the roles scope and company stability first: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Bootstrapped, small NYC performance-marketing/adtech firm (small/intermediary-is

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
