Hiring Team at NVIDIA

I am applying for the Technical Product Manager - AI Infra Resilience role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Built High Era — a full go-to-market automation OS (FastAPI + SvelteKit + GCP), architected end-to-end as a single operator.

WHY I AM A STRONG FIT:

- NVIDIA is building Full AI stack: GPUs, CUDA, NIM microservices, Nemotron open models, AI infrastructure software, and... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- depth as a growth area: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Public company

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1iom9zq

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
