Hiring Team at Open Systems Technologies

I am applying for the Director, Product Owner role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Open Systems Technologies is building N/A directly — places AI/product talent at client companies (the actual roles are at unnamed client... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- clarify the client before pursuing: Unified access models across legacy and new product surfaces, unlocking new revenue.
- Ive shipped the work this role calls for — including: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

A FEW SHIPPED REFERENCE POINTS:

- Private (staffing/recruiting firm; established 1990)

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-17a87eo

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
