Hiring Team at Pax8

I am applying for the Sr. Product Manager - Platform Engineering role (United States).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- Pax8 is building AI and enablement in the Pax8 Marketplace; platform engineering for a global cloud commerce... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- I engineer PM who improves developer velocity and reliability: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.
- Ive shipped the work this role calls for — including: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-xdetmo

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
