[COVER LETTER](#) · [RUNLAYER](#) · [FORWARD DEPLOYED ENGINEER / MOTS, IDENTITY](#) · [REMOTE \(US\)](#)

Hiring Team at Runlayer

I am applying for the Forward Deployed Engineer / MoTS, Identity role (Remote (US)).

My pitch for this role is simple: I have already spent years solving the enterprise identity and trust problems that agent infrastructure is now inheriting.

WHY I AM A STRONG FIT:

- Identity is my deepest domain: I replaced a legacy identity & subscription system servicing billions of monthly requests across 10+ products, and configured SAML/OIDC SSO for 150+ enterprises.
- I already think in agents + tool calls: lupine.science coordinates MLIP benchmarks and Python research pipelines while lupi.live provides the TypeScript/WebGL product surface — I understand the access and audit surface agents create.
- Forward-deployed credibility: Direct enterprise relationships with security-conscious legal teams; I translate between security requirements and shipped product.

A FEW SHIPPED REFERENCE POINTS:

- SAML / OIDC / SSO for 150+ AmLaw 200 firms
- Unified access model across 10+ products
- Multi-agent orchestration built end-to-end

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-runk89

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
