COVER LETTER · SIERRA · PRODUCT MANAGER, AGENT DEVELOPMENT · NEW YORK CITY

Hiring Team at Sierra

I am applying for the Product Manager, Agent Development role (New York City).

My pitch for this role is simple: I am most effective in roles where product strategy, agent behavior, and implementation details all need to stay in one person's head at once.

WHY I AM A STRONG FIT:

- Agent platform product experience: Led 3D platform features (avatars, explorable spaces, auth) for Alo, Moncler, Ralph Lauren at Obsess, and set long-term SaaS + SOC 2 strategy.
- I build what I spec: lupi.live and lupine.science form a working materials-science AI system I designed and built — MLIP benchmarks, phase-change trajectory simulation, TypeScript/WebGL browser, Python research pipelines.
- Enterprise scale + reliability instinct: Rebuilt systems serving billions of requests; I sweat reliability, access, and the long tail of enterprise needs.

A FEW SHIPPED REFERENCE POINTS:

- Agent/3D platform shipped for global enterprise brands
- Multi-agent orchestration built end-to-end
- SOC 2 + usage-analytics pipeline owned

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-gkbbxd

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
