Hiring Team at SpotOn

I am applying for the Product Manager (Dashboard) role (New York, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- SpotOn is building AI/automation in restaurant operations, analytics, and dashboard insights; data-driven merchant... — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- platform/dashboard and growth: Shipped High Era as a single-operator production platform on GCP — content generation, workflow engine, analytics.
- Ive shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-x5rw47

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
