Hiring Team at Talution Group

I am applying for the Staff Product Manager role (Brooklyn, NY).

My pitch for this role is simple: I'm a technical PM with 12+ years across AI, identity, and platforms. I've shipped AI, platform, and identity products end-to-end across multiple regulated and consumer companies.

WHY I AM A STRONG FIT:

- Talution Group is building N/A directly — places product/data talent at client firms — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- platform + AI product depth; ask the recruiter to identify the client to tailor positioning: Unified access models across legacy and new product surfaces, unlocking new revenue.
- I've shipped the work this role calls for — including: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.

A FEW SHIPPED REFERENCE POINTS:

- Private (IT staffing/recruiting firm; founded 2009)

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-15zgs0s

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
