[COVER LETTER](#) · [TEEMA](#) · [AI PRODUCT MANAGER](#) · [UNITED STATES](#)

Hiring Team at TEEMA

I am applying for the AI Product Manager role (United States).

My pitch for this role is simple: I'm a product PM who has driven subscription growth at scale. Built the type-safe AI API workspace with self-improving usage accuracy at LBR.

WHY I AM A STRONG FIT:

- TEEMA is building Recruits AI/ML and product roles for client companies; the actual role belongs to a client — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- AI-agents/devtools and document-AI shipping record; ask the recruiter to disclose the client to tailor the pitch: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Ive shipped the work this role calls for — including: Built contextual, data-informed content systems that drove cross-platform adoption at Arkadium.

A FEW SHIPPED REFERENCE POINTS:

- Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-18w1w3a

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
