Hiring Team at Warner Bros. Discovery

I am applying for the Staff Product Manager, Ad XP role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

WHY I AM A STRONG FIT:

- Warner Bros. Discovery is building Streaming personalization and search, ad experience/ad-tech, recommendation ML, content discovery — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- monetization/subscription growth experience: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

A FEW SHIPPED REFERENCE POINTS:

- Public company

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1osxe60

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
