Hiring Team at Rockstar Games

I am applying for the Associate Principal Product Manager, Platform role (Manhattan, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.

WHY I AM A STRONG FIT:

- Rockstar Games is building No prominent public AI product; AI a contentious internal/labor topic — and my shipped work maps to it.: See [experience.ts](#) (LBR/Obsess/Manatt/Arkadium) for adjacent work.
- a platform PM with identity/accounts and security experience for large-scale online services: Unified access models across legacy and new product surfaces, unlocking new revenue.
- Ive shipped the work this role calls for — including: Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

A FEW SHIPPED REFERENCE POINTS:

- Private subsidiary of Take-Two Interactive (NASDAQ: TTWO)

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-10oe3qg

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
