COVER LETTER · MONGODB · SENIOR PRODUCT MANAGER - IT GO-TO-MARKET AI · NEW YORK, NY

Hiring Team at MongoDB

I am applying for the Senior Product Manager - IT Go-to-Market AI role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.

WHY I AM A STRONG FIT:

- MongoDB is building Atlas Vector Search, semantic search, RAG; acquired Voyage AI for embedding/retrieval models to... — my relevant shipped work: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- agents/devtools PM at Obsess: Shipped RAG-powered semantic search over an editorial corpus, deployed at alexwelcing.com.
- Ive shipped the work this role calls for — including: Integrated MCP servers and agent skills into production research tooling.

A FEW SHIPPED REFERENCE POINTS:

- Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.
- Led the 3D experience platform at Obsess — avatars, analytics, SOC2 — shipping for global enterprise brands.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-14v6ktp

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
