Hiring Team at NTT DATA North America

I am applying for the AI Product Manager role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

WHY I AM A STRONG FIT:

- NTT DATA North America is building 'tsuzumi' LLM family (tsuzumi 2, Oct 2025); private/secure GenAI; partnerships with NVIDIA and... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- AI and enterprise AI delivery: Took a legal-publishing SaaS from beta to millions in ARR with enterprise-grade data governance at Manatt.
- Ive shipped the work this role calls for — including: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.
