Hiring Team at Document Intelligence / Knowledge AI

I am applying for the Document AI / Knowledge Product Roles role (NYC / Remote / Regulated domains).

My pitch for this role is simple: Built for legal AI, document intelligence, enterprise search, knowledge management, RAG, and expert-workflow products where extraction quality and trust drive adoption.

WHY I AM A STRONG FIT:

- I have shipped document AI in legal publishing: At Manatt, built AI-based document scanning for legal publication, automated image selection, sharpened knowledge-graph precision, and reduced manual error in a domain where correctness mattered.
- Expert workflows need trust infrastructure: Led IAM for a research platform serving 1,000+ clients and later handled enterprise SSO for 150+ AmLaw 200 firms at LBR, giving me the access-control and deployment context behind document AI adoption.
- I can connect retrieval, UX, and product outcomes: Built semantic-search work with OpenAI embeddings and pgvector on alexwelcing.com, and led platform work where search, structured content, and user trust determined whether the product became useful.

A FEW SHIPPED REFERENCE POINTS:

- AI document scanning shipped at a top legal/professional-services firm
- IAM for 1,000+ client research platform users
- Strong fit for legal AI, knowledge AI, RAG, and expert document workflows

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1c96ato

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
