Hiring Team at Posh

I am applying for the Lead Technical Product Manager, Platform role (New York City Metropolitan Area).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- Posh is building Purpose-built conversational/agentic AI for financial institutions across voice, digital, training,... — my relevant shipped work: Created CreateSuite: an autonomous multi-agent orchestration platform with git-backed persistence across 6 model providers.
- I build agent/conversational-AI platforms (Obsess) plus identity/security depth (LBR) for regulated financial use: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.
- I've shipped the work this role calls for — including: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.

A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1dc7yow

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,

Alex Welcing
