Hiring Team at Daloopa

I am applying for the Product Manager - AI role (New York, NY).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

WHY I AM A STRONG FIT:

- Daloopa is building Data extraction/structuring AI; MCP integration to feed AI systems accurate financial data — my relevant shipped work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- Manatt document-AI as I build extraction pipelines where accuracy on messy source docs is the product - exactly Daloopas core challenge: Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Ive shipped the work this role calls for — including: Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1eg2x2y

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
