I'm a platform PM who has shipped developer tools at scale. Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

Daloopa is building Data extraction/structuring AI; MCP integration to feed AI systems accurate financial data — my relevant shipped work:

Re-platformed the identity & subscription system handling billions of monthly requests across.

Manatt document-AI as 'I build extraction pipelines where accuracy on messy source docs is the product' - exactly Daloopa's core challenge:

Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

I've shipped the work this role calls for — including:

Set the multi-year SaaS platform strategy for enterprise brand deployments at Obsess.
