Hiring Team at Datadog

I am applying for the Product Manager II - Security Graph Foundations role (New York, NY).

My pitch for this role is simple: I'm a technical PM who has rebuilt enterprise identity at scale. Set access-control policy across the research platform during its transition from on-prem to multi-tenant cloud.

WHY I AM A STRONG FIT:

- Datadog is building LLM/Agent Observability, AI Guard, Sensitive Data Scanner, GPU monitoring, Model Lab, AI & Data... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- LBR identity & security PM plus Arkadium platform work: Re-platformed the identity & subscription system handling billions of monthly requests across 10+ products.
- I've shipped the work this role calls for — including: Unified access models across legacy and new product surfaces, unlocking new revenue.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1ipdoqr

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
