Hiring Team at Gartner

I am applying for the Sr. Platform Product Manager, AI Platform role (Stamford, CT).

My pitch for this role is simple: I'm a platform PM who has shipped developer tools at scale. Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.

WHY I AM A STRONG FIT:

- Gartner is building AskGartner AI tool for accessing proprietary insights; building an internal AI platform to deliver... — my relevant shipped work: Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- AI-platform/devtools framing: Obsess agent tooling + Manatt RAG/document-AI as proof Alex builds the AI platform others build on: Designed and shipped a type-safe workspace for executing AI APIs with live introspection across three internal APIs.
- Ive shipped the work this role calls for — including: Operated as the only PM in a build that shipped a full marketing-automation OS to production on Google Cloud.

A FEW SHIPPED REFERENCE POINTS:

- Pioneered NLP-driven AI content partnerships at Arkadium, cutting go-to-market time by 25%.
- Drove cross-platform adoption of contextual, data-informed content systems at Arkadium.
- Re-platformed the identity & subscription system at LBR, unifying access across 10+ products.
