Hiring Team at Capital One

I am applying for the Manager, Product Management - Customer Assist Observability role (New York, NY).

My pitch for this role is simple: I'm a hands-on PM who has shipped production multi-agent systems. Led the 3D experience platform at Obsess — avatars, analytics, SOC 2 — shipping for global enterprise brands.

WHY I AM A STRONG FIT:

- Capital One is building Enterprise AI/ML platforms, agentic AI for customer assistance, developer productivity, and data... — my relevant shipped work: Lupine Science — Alex's materials-science AI platform: shipped MLIP benchmarks, phase-change trajectory simulation, and a TypeScript/WebGL browser for real-time molecular visualization. Combines research-grade physics with a shipping product surface.
- I build tooling to monitor and improve AI-agent quality and reliability at Obsess: Integrated MCP servers and agent skills into production research tooling.
- I've shipped the work this role calls for — including: Built an inter-agent mailbox for cross-agent communication, modeled on git-style storage.

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1ka5gwh

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,
Alex Welcing
