COVER LETTER · ANTHROPIC · FORWARD DEPLOYED ENGINEER, APPLIED AI · NEW YORK CITY

Hiring Team at Anthropic

I am applying for the Forward Deployed Engineer, Applied AI role (New York City).

My pitch for this role is simple: I already work the way Anthropic needs a forward-deployed engineer to work: I embed with users, build the system, and feed the learning back into product.

WHY I AM A STRONG FIT:

- I build production agents, not prototypes: lupi.live and lupine.science are my materials-science AI stack: MLIP benchmarks, phase-change simulation, and a TypeScript/WebGL browser for real-time molecular visualization.
- Enterprise deployment is my day job: At Law Business Research I ran white-glove SSO (SAML/OIDC) onboarding for 150+ AmLaw 200 firms — the exact customer-facing, high-trust deployment motion an FDE lives in.
- I prototype in TypeScript and Python and ship: Hands-on architect PM: launched an AI API execution workspace with oRPC, type safety, and live introspection that improved model accuracy across 3 internal APIs.

A FEW SHIPPED REFERENCE POINTS:

- Billions of monthly requests served by systems I rebuilt
- 150+ enterprise SSO integrations delivered
- MCP servers, sub-agents & skills shipped as independent systems

Packet (résumé, cover letter, and a 30-second role pitch): welc.ing/r/pkt-1kvr70d

I would welcome the opportunity to discuss how I can contribute quickly, operate with high autonomy, and ship for this team.

Best regards,

Alex Welcing
